### XIII. EVALUATION

i. Private association	Possible
Note	<p>The nature of the group is enigmatic. <i>Phratra</i> is attested as a designation for private associations, as is the use of <i>peri</i> followed by personal names. But both designations are also attested for official institutions. The organization of a festival for the whole village is not decisive. Robert 1983: 50 argues that <i>phratra</i> is to be understood along the lines of <i>synbiosis</i> and <i>hetaireia</i>, i.e. as a designation for an indigenous cult association. However, the same type of stele (with standardized images of the members) is attested several times in the region, and in some cases, the private nature of the group seems rather doubtful (cf. <a href="#">CAPIInv. 453</a>). It is probably best to regard these groups as semi-official institutions (with voluntary, rather expensive membership) that were responsible for representing their villages vis-à-vis the gods.</p>
ii. Historical authenticity	Certain
