VIII. PROPERTY AND POSSESSIONS

ii. Realty The papyrus records the sales of various property (presumably) by the state through *praktores xenon*, to

various individuals. The passage where the association is mentioned (in the dative case) is fragmentary and the context is not clear: a ship and doum palm wood are mentioned in the two immediately preceding lines. Perhaps the association owned some palm trees, which were sold for various purposes?

XII. NOTES

i. Comments The text is very fragmentary and we cannot know more about the association in question.

i. Private association Certain Note Despite the fragmentary state of the passage, the reading of the name of the association is certain and the terminology used (synodos) makes it certain that we have here a private association..
