XIII. EVALUATION

i. Private association	Certain
Note	<p>The associative terminology and the apparently necessary declaration suggests that this was an association; private here because, in spite of the nature of the declaration itself, there is nothing here to suggest that this group was other than voluntary (although state compulsion may be something else entirely). The space of seven years between 3734 and 3750 does not rule out the possibility that we are dealing with the same group, and more than likely was.</p>
