## XIII. EVALUATION

|                        |                                                                                                                                                                                                                                                                                |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| i. Private association | Possible                                                                                                                                                                                                                                                                       |
| Note                   | The eight persons listed have built the <i>oikos</i> . Milik 1972: 140 argues that this points to a <i>thiasos</i> with ten members, the two leaders not being mentioned in the list. This is, as Milik's general reconstruction of associations in Dura, rather hypothetical. |
