VII. ORGANIZATION

ii. Leadership	As is often the case in Macedonian associations related to an official cult, it is unclear whether the priest, whose name is used for dating purposes (ll. 4-6), was a priest of the association (so Edson 1948: 137), or of the official cult of Dionysos.
iii. Members	The honorand is called a συνμύστης, <i>synmystes</i> .

-------------------------------------	--

XI. INTERACTION

i. Local interaction	There are two other associations of <i>Asianoi</i> in Macedonia. The one bearing the exact same name is an association of Lete, see CAPIInv. 515 , while the other association of <i>Asianoi</i> (CAPIInv. 723) from Thessalonike is called a <i>bakcheion</i> and not a <i>thiasos</i> . It is therefore preferable to speak of three distinct associations of <i>Asianoi</i> (two of them in Thessalonike) rather than of attestations of the same association (cf. Nigdelis 2006: 239-41).

XIII. EVALUATION

i. Private association	Certain
Note	In the context of Dionysiac cults distinguishing between <i>thiasos</i> denoting the sum total of the god's devotees in a particular city and <i>thiasos</i> as a private cultic association is often strenuous. In this case, however, the fact that the group's name has a further mark of distinction (<i>thiasos</i> of the <i>Asianoi</i>) ensures that we are dealing with the latter case.
